Hi Rich. Last Friday (10/10), Scotty from Island =nvironmental was in the property to spray the plants. He called my =ttention to some fungus (mushrooms) on the base of one royal Palm & =ew near the ficus shrub. He said its ganoderma and will let his Boss =ome to inspect it.

Today, October 14, John Schiller & another =uy were outside to check on the said ganoderma. John , asked me to =heck the Royal Palm with him which he said needs to go since it's =ntreatable. I asked him to make a report so that we can forward it to =Y.

The white thing on the base of royal Palm are the =anoderma.

Thank you.
