Good night Boss

I just finish a conference call with Mr. Chris Singletary (Site Tech Services inc.) whom is highly recommended by Full Compass our Technomad retailer, Shawn Tallard. Chris states he has received the list of equipment from Shawn. He would like to perform an onsite review of the system to evaluate it. The visit will cost the price a 2 day round trip flight to St. Thomas along with room and transportation. If he is able to adjust the system on this visit there will not be any additional cost. If it requires another visit he will provide a detail quote with the recommended adjustment.

Is this something I should continue to pursue?

Please advise
