I see it as a Mini but it's classed as a 'midi'

It's bigger than the minis we have but it's small in comparison to an excavator. I'm looking for the lifting weight now for this 50D....

The attached Excavator is not a mini, it's a =egular size excavator. I'm not sure who told you about width or tracks =ut the Boss would like a size up from what we are using at the =oment

Jules, Chris & Tap has confirmed this =xcavator

Rich.

I was told we were trying to keep the width of =he tracks under 8' due to the preferred width of the roads. I'm =ith you though, I thought it was supposed to be the biggest we could =et with the width limit.

If they are replacing a mini, the D50 is a =ood choice

If it's a mini excavator your looking for, this is a decent choice.  
4 cylinder yammer power and decent size.  
It's a 40 horsepower unit. Bigger than most minis but still a mini.

Good morning Bosco,

Tap & Chris agreed on an Excavator for LSJ. Please advise if your in a agreement

with this Excavator
