First.

I never said a laptop=was connected to anything. You assumed that it wasn't done. I said that I w=uld have to check with Smiley and you became really angry because you said t=at you requested it from last week. Don't put words in my mouth =div>

Second.

In Danny's defense, If anything is removed for whatever r=ason and we have a problem how is he going to fix it. Even though Danny sai= not to remove it. Smiley still did what you asked him to do. It's n=t fair for me to be guessing who's the point person when we're dealing with=nbsp;such a sophisticated machine

Third.&nbs=;

Jermaine took the laptop to STC

I'm a little confused, in our conversation today you indicated=the laptop was still connected to the RO Plant and Danny said it needed to s=ay to run the RO Plant.

To confirm the Lapt= doesn't run the plant it is a virtual machine, Basically it gives us the a=ility to look in Remotely to the RO Plant.

As stated a copy of th= Program for the RO Plant PLC is on that Laptop.

The reason for r=moving the Laptop was to protect that program from harms way, hence the con=ern when you mentioned it was still attached to the RO plant

=/div>

As indicated in yesterdays conference call the RO Plant has=been Badly Maintained over the past few years.

All Rich and I try=ng to do, is get Plant Repaired, and get the support needed to Run the Plan= Efficiently, so the Boss is not in this situation ever again.

can you confirm Jermaine has Laptop?

t=ank you
