Subject: G650

Leon:

We need to hear from you sooner rather than later on=whether you want the G650 divider if you buy the Bass Brothers plane. = The divider takes 6 weeks to install, even after it is built. So th=s issue may dictate the timing of closing. We are drafting a letter of intent for the purchase, and need to incorporate the rough timing into that.

As discussed, the divider is already constructed, an= they will throw it in for free.

You could elect to take with the curtain, put the di=ider in storage and later decide to install the divider. But since it takes 6 weeks to do that, this option could prove quite disruptive to you= future use of the plane.

Maybe you could either call me, or just let Melanie =now what you want.

Barry
