Shall we do this new facial on Fri or Sat (I am Completely free both days).=The needles have arrived already and I can use my current machine (the new=dermapen is arriving on MArch 13th).

I have got all the materials (sur=ical gloves, ampules with the serums, etc) + after the procedure itself we=can do a carbo dioxide korean facial - a great regeneration after ne=dling!

All together takes about an hour (at=least 40 min). You will love it!!! I know it's too little too late, bu= let's try??
