<<https://upgradecompany.com/brands/product/170-mcintosh-mx121=av-controller>>

The MX122 replaces the MX121 model and adds multiple upgra=es, including 4K video support with high dynamic range (HDR) passthrough, Bluetooth, more streaming services, Dolby Atmos object-based surround, and upgradability to DTS:X object-based surround and to Auro-3D surround

Grr. That receiver doesn't support 4K pass through either. Th=t means that you can't get 4K video through it.

Hey.

<=div>

We ran into some hiccups getting the 4K Apple TV working in NYC (=he receiver doesn't do 4K pass through and the cables have to be u=graded).

How is your movie room's A=ple TV connected?

Is there a receiver between the Apple TV=& projector? If so what's the make & model?

How new are your HDMI cables?

Thank you,=font>
