Jeffrey

Gulfstream is working with Honeywell the manufacture of the Radar,.

As of late last night Honeywell located a r=dar in France, which would take 2 days to arrive in PBI , better update by=11am today, as HoneyWell and Gulfstream search for radar state side. <=div>

Today departure not looking promising. =

Thx
Larry

Begin forwarded message:

We are attempting to acquire the RT from H=neywell but not having much luck. The only unit so far is in Toulouse= France which will take at least 2 days before we would see the part here in PBI.= Honeywell is searching their inventory in hopes of finding a rental u=it here in the states but are not too hopeful. We will know more in t=e A.M. as to whether or not Honeywell can locate a unit here in the states.= We are looking into other options but again it won't be until the mor=ing before we could make any decisions.
