A couple of links I forgot to send you=

1) http://ramtin-amin.fr/#nvmedma <http://ramtin-amin.fr/#n=medma>  --> seems like it is poss=ble to dump the secure enclave from an iPhone. Not too big of a deal in its=lf but this might lead to attacks there. The secure enclave is where passwo=ds, CCs and credit card info are stored

2)&n=sp;http://blog.frizk.net/2016/12/filevault-password-retrieval.html?m== <http://blog.frizk.net/2016/12/filevault-password-retrieval.ht=l?m=1>  --> update to the last version of OS X because in previous ver=ions it is possible to steal the encryption password even if you have full d=sk encryption turned on unless the laptop is fully shut down

Happy holidays!

Sent from my Iphon=
