Dear Jeffrey,

We look forward too.

I have been working on the paper for the institute. ♦=A0

I would prefer if you would write only to my e-mail about the institute, since there are other people who read Noam's e-mail and I would like to keep the subject more private at this point.

Noam will write about your questions. As always, you have very interesting ones. Very good abstract insights in my opinion.

Really glad that you want to support the project. It is a major incentive.

We'll be there on Thursday.

Valeria

<[REDACTED]>  
look forward to seeing you on Thurs. . is there anything in writing on the institute idea? ♦=C2 ♦ I would fund anonymously so as not to pollute the work with pre-s.

Is Noam conversant with category theory as a notation for theories. ( any science of relationships objects collections, including mathematics). .. is language the equivalent of a subset of the sound/time domain , organized as a coherent shape space. exactly the same as an image as a coherent shape space in the light/visual domain. both including a time component? ♦=C2 ♦ . permitted morphism in the space would map to sentences. as they would mappings to objects in visual space.

in my discussion this week with a large group of AI people , ♦=C2 ♦ I quoted the natural stupidity. story that you told me. ♦=A0 however, I thought that as opposed to answers , the focus might be better on questions. than answers. Common sense is common to most animals, I suggested that it is the ,what more? why not? that separates the higher functioning. ?
