we received pathology this afternoon and unfortunately the cancer spread to 3 of the 4 lymph nodes removed the tumor that was removed was 0.8cm and the largest metastatic nodes measured 0.1cm which appears good however the metastasis was level VI which we were told was middle range for aggressiveness

we will be meeting with the team for treatment on thursday but it appears that radioactive iodine is what our next step is..

we were told lisa needs to wait 6 weeks before we begin treatment for her neck muscles to heal sadly=another hurdle but hoping it will be the last one..
