Good Morning Boss,

I found a guy how would be able to do it. His is looking into the material and parts for your primary idea of making the coach seat a second front passenger seat with all the features (tilt, forward/back movement, etc..). I told him if it can't be done that way that you were ok with just moving the coach seat harness back. (He really likes your primary idea.)

I also approached Danny E. yesterday (your assistant electrician who repaired Little C and sprayed the blue bike) to see if it can be done in house. He will look it over next week to give me his opinion if it is something that he can do.
