Good Evening

Attached suggested samples of fabric for the metal furniture in the Yurt Based on your direction you wanted Red and Yellow tones - Pendleton style = I sourced out wholesale options which are \$20.00 a yard rather than retail=running at \$36 to \$60 a yard

The blue tone fabric option is based on the color palate of the "loin clot=s" on the status in the yurt, but agree that the red and yellow option work= best

Sample fabrics selected are good quality and the red and yellow tones can b= pumped up with accents (throw pillows, edging, grommets etc) and leather a=d wooden tones will work well for all and will provide a warm inviting spac=

Which of the options do you prefer?

Once selected fabric, foam, batting and notions are on site it will take m= approximately 5 days to complete work construction Please advise Thank you Warmest regards Karen
