Curious about Mathematica 9? See it in action at three free online events. Our experts will introduce you to new features in usability, computation, data manipulation, and visualization.
Live Q&A sessions during each online event give you a chance to ask questions, and a chat lounge will be open and staffed by Wolfram associates following the panel presentations.

Predictive Interface and Units, December 10, 1-2pm EST Get a look at a new interface paradigm and systemwide units support.

Social Networks and Data Science, December 12, 1-2:30pm EST Learn about new social network analysis capabilities with built-in access to social media data, plus other graphs and networks enhancements and new computational features in data science.

Data Manipulation and Visualization, December 14, 1-2:30pm EST Get the scoop on new features for image and signal processing, visualization, units support, and integrating with R.
