Subject: Permitting - May 6, 2015

Greetings Sir,

We hope you are feeling =etter.

John met with JP Oriel and David Rosa of C=M yesterday regarding the proposed new mechanical wreckshop building.

1. JP has no issue with the abutment, so your suggesti=n to flip the position of the building to as close to the edge as possible=should not be challenged when the permit application is submitted.
2. JP is not certain at this time if the permit applicati=n for this new building should be a minor permit or a major permit. =ohn is requesting a minor permit, as the new building is simply a replacem=nt of two existing buildings.

John will follow up=with JP by Friday to hear his decision.

Respectfu=ly, Daphne
