Advised Future Tech=of your concerns regarding down time of phone service during install of new Microwave link.

The best they can do is

Slide the existing T1 link down the tower on Sandia Crest and Ranch, re-establish service  
this will take two days and 4 men, cost \$6800.00, /down time 2 days instead of 5 days  
once new link is installed, decommission old T1 line, down time 2-4 hrs.

do you wish to proceed with this option

regards Brice

ok

will see what we can do about phones

Future Tech are=scheduled to be on sight July 31st for the install of Microwave Link from =andia Crest to Main House.

Install of Link is expected to take 5 to 7 days

There have some changes to the initial =esign.

Due to =engineering and tower owner concerns, the existing T1 link will be decommis=ioned, N=w Antennas will be installed in place of existing.

T1 Phone service and Data services wil= use new link,

Please note during this time Phone Services to the Ranch will=be disrupted.

=br>

CenturyLin=

There is an i=sue with the Fiber Install on Sandia Crest.

The initial install entailed laying 6-8 ft of=conduit from Centurylink Demark to an Existing Conduit owned by tower own=, Sierra Nevada Towers.

The Tower owner has indicated the existing conduit has been badly=damaged and there will be a need to lay a new run of conduit from Dmark to=his building. (40' rigid buried and 140' above ground galvanized c=nduit.), Sierra Nevada have indicated a Estimated Cost of \$4500.00, with</=iv>

work been comple=ed by Thursday next week

Centurylink have indicated this could possibly delay install of Ci=cuit

Do I have your appr=val to move forward with Sierra Nevada

Regards Brice
