Good Day Sir,

The Installation is completed and LSJ =s using the Full 50 megs of bandwidth. I am however tweaking the dead spots, which is challenging. I will be changing the configuration at the tower to help with this. I am also setting up for the backup link at the tower, to keep the network up 24/7 in the event Choice goes down.

As =o a completion date sir, I have no answer like I said it's just =weaking and now adding the backup at the tower which would take about 2 =ays.

I =m in STX for the next 3 days, and will schedule with Anna and Jermaine =hen I get back.

If you have any questions feel free to give me a =all.

Regards,

Terrence Rabsatt
