**Subject:** Re:

I am still unsure about what I want to do. I am not sure if you knew, but I have been interning at Airware in SF (they sell UAVs to commercial enterprises). Overall it has been a great experience -- I like the company and my colleagues a lot, and I have been improving my coding skills. They have offered me a full time job, but I have not accepted yet. A part of me misses the old research I was doing, and sometimes I wonder if I should go back to research via MIT, MIT Media lab, or some other channel I like that.

My dad has been doing well overall, but it's been very busy as you can imagine.

I hope you are doing well.

Best,  
Alexa

p.s. Did you hear about LIGO's detection!! It's been a very exciting time for the collaboration. I was a co-author on the PRL paper and they also reference one of my first author papers. I am so fortunate to have been a part of this collaboration and this historical event.
