Tumi is the only luggage place I've found that can monogram in time for the 2=th. I think they are the best quality and set up for luggage. They have the=below special edition color in gray coated twill with chocolate brown leath=r trim for \$1495. They also have a black version for \$1195. They are expand=ble with a fold out hanging option. The last photo is their basic line which is the one I have that also expands= has hanging option and is \$595. I'm assuming you want carryon size? The small leather tag on the front of the case is what they would monogram. T=oughts?
