Subject: bgc3 Deliverables and Scope

Bill —
Larry and I have been working on deliverab=es for my time at bgc3 since you and I spoke. At Larry's request I=have spoken with Rodger, Mark, Chris, Trevor, Geoff – and next wee= Bose/Jonah. Everyone has offered guidance, advice thoughts and ideas.
As Larry works to put together any require= documentation, we are trying to make sure we make this time valuable for =ll.
Two areas where I am interested, in terms =f scope: domestic health and neurotech/brain science.
I propose these as deliverables, please le= Larry and I know what you think.
Deliverables:
1. &nbs=; To improve access and secure personal health data (affordabil=ty/access) -->Blueprint and/or recom=endations for a zero knowledge proof-based digital system to secure private personal=health information while allowing access to digitally redacted personal in=ormation
2. &nbs=; Whitepaper on consumer health expenditures in the USA
3. &nbs=; Whitepaper and/or recommendations on neurotechnologies relate= to chronic/degenerative disease
4. &nbs=; Whitepaper on Neurotechnologies as weapons in national intell=gence and defense
5. &nbs=; Follow-up recommendations and/or technical specifications for Strain pandemic simulation
Happy to do whatever else is helpful �=80� or adapt along the way.
Thanks for the opportunity…hope th= weekend is off to a good start.
