Subject: meal carriers

Jeffrey,

I have exhausted the "meal carri=rs" that I believe would be practical and fit in the cavity (18=;wide x 23"deep. Total height of cavity is 25" (leaving =o room for dirty dishes.

I believe your best solution is an ins=lated soft side bage that is easy to carry and maneuver through the aircra=t and most forgiving should someone (Larry / Dave) "bump" into a chair back by accident.<=p>

This one is pretty cool as you can hav= jojo plug it into a cigarette lighter to stay warm. The only thing =s that the person retrieving the food would have to slide the bag out of the cavity to gain access as the "access panel&=8221; is on the fwd side – NOT the inboard side.</=p>

We can make some simple removable shel=es for the bag(s).

<=span>

<=span>

Best Regards,

Eric
