Subject: you guys know me facts

This information sheet discusses the type of chargers=used and the various charging modes. In a standby application, the generator set is stationary =ost of the time, running only for exercise periods or during a power outage=. The engine-mounted charging alternator on a standby set normally will no= run sufficiently to ensure the starter batteries are charged for rapid an= reliable starting. =o ensure the battery is adequately charged while the generator set is stat=onary, a separate static battery charging system is recommended. NFPA 110 =chedule calls for inclusion of an automatic charger system that operates w=thout any manual intervention. (Continued over) Diagram 1

t=is is what I did !!!

thanks danny
