I reached out to Paul (the doctor). We are going to speak =ver the weekend and possibly meet when he is in New York on the 18th Octob=r.

I had a thought though. I stopped the wellbutrin com=letely about 3 months ago. I definitely notice my drive and motivation are=super low at the moment. I am wondering if it was in fact helping!? Maybe =ot at the ridiculous dose I was initially on but at a lower dose.

(Love you as always :))
