Thank you all again for the introductions. Every single meeting was i=spiring and very interesting to me. It might be a good idea to talk to Deb=Roy later on.

With grateful regards,

Just made intro= to Deb and Siggy might be good. Siggy is doing PhD on planning algorithms=to model behavior that MIGHT have an overlap.

Hi Joi,

My own interests are in integrat=d cognitive architectures (i.e. things that Josh Tenenbaum does), with a f=cus on computational models of motivation and affect. I am modeling the em=rgence of goals and decision making from a set of cognitive, physiological=and social drives, and the emergence of affect from cognitive modulation.<div>

I would also be very interested in learning more about =eb Roy's work, because I love the paradigm of stepping up the ladder o= child performance as a way of understanding the mind.

Hi Joscha, is there any particular person or g=oup you'd like to meet?

Ryan, can you help coordinate this?
