Hi Jeffrey,

I've been dealing for the last weeks with DPNR first, who's sent me to US Custom and I just got the answer. Apparently it will be difficult to import those from Argentina, because of specific regulations and quarantine needed. However I do have a supplier in Spain where it will be much more easy. I'm no longer dealing with custom, but with USDA (United States Department of Agriculture) and I should get answer in two weeks I'll keep you posted.

Regards,

Kevin.
