From: Anna To: Boscoe  
-Hey Bosco any updates on the barge ?

From: Boscoe To: Anna  
-Yes.  
Pins are prepped. Bushings are cleaned. The holes for the grease have been re-drilled so the grease will get inside where it wasn't before. The truck is packed and ready to set up the welding tomorrow morning on the barge. We are still missing one grease fitting and it still needs some work to be sure the grease will get to the pins.

From: Boscoe To: Anna  
Big day tomorrow. Maybe we will get to test it tomorrow afternoon late. If not, tomorrow morning if all goes well.  
BTW. Karl is really good help. Makes this a lot easier and quicker.

From: Anna To: Boscoe  
That's great :) thanks you  
Ann R.
