In May, the San Francisco Declaration on Research Assessment (DORA
<http://p4trc.emv2.com/HS?a=ENX7CqkWrP9-8SA9MKJS4ATnGHxKLruK6vcStGb5lw8W0bBhOG5mpqVsje_HhdBmMIB0>) launched, with F1000 as one of the original
75 scientific organizations to sign the Declaration.

DORA is about using more appropriate and accurate ways than the journal Impact Factor to measure the impact of individual research projects - including through F1000Prime recommendations

A major breakthrough in synthetic biology enabling the production of large quantities of powerful anti-malarials will substantially improve the provision of malaria therapy, at a lower cost to the developing world.

A potentially significant advance in the path to new treatments for diabetes: the identification of a hormone primarily expressed in liver and fat - 'betatrophin' - that specifically induces vigorous β cell proliferation.

Intestinal bacterial metabolism of red meat promotes atherosclerosis, suggesting it might not be our own genes but rather the genes within the bacteria in our GI tracts that promote heart attack risk.

Publish your negative findings - free!

<http://webr.emv2.com/faculty1000/F1000_Monthly_images/spacer.gif>

At F1000Research, we believe that all valid and well-conducted research should be published; positive, negative or null, it should be part of the scientific record.

If you have negative results in your lab notebooks from well-conducted studies, this is the time to write them up and submit them to F1000Research. Until the end of August, we are waiving the article processing fee

<http://p4trc.emv2.com/HS?a=ENX7CqkWrP9-8SA9MKJS4ATnGHxKLruK9fcStGb5lw8W0bBhOG5mpqVsje_HhdBmMIGX>

for articles that report negative or null findings (use code NR14 in box 6 on submission).

We are also asking for your feedback about scientific quality in negative-results studies. If you would like to join the discussion, visit our blog <http://p4trc.emv2.com/HS?a=ENX7CqkWrP9-8SA9MKJS4ATnGHxKLruKivcStGb5lw8W0bBhOG5mpqVsje_HhdBmMIGU> and leave a comment.
