Subject: Person you should meet now in NYC

Hi Jeffrey,

I'm still in HK and keen to meet up with you, but a friend of mine is in NYC at the moment and would be interesting for you to meet. He's revolutionising our understanding of health and medicine (focusing on homeostatic capacity rather than physical state). Here is info on him: <http://www.drjoonyun.com/>

Confidentially, he was given 2 years to live about two years ago due to an autonomic nervous system issue (has seemed to have overcome it). I stayed at his place in Palo Alto a few days on my trip last year.
