Dear Mr. =ahn,

Again, thank you for your interest in CleanSands, Inc. and =ur line of beach cleaning equipment and accessories.

As =ou have seen the Barracuda walk-behind model is ideal for medium size =eaches or sand areas. The model is very easy to work with and designed =or maneuverability. The unit is available with 3 different sifting =creens, 8mm 12mm 15mm which take about 5 minutes, (2 bolts), to change =n the field and is powered by a Honda 6.5HP GX200 motor. Weight of the =nit is 650 lbs.

The =arracuda takes advantage of the new suspension track system that =events sand compaction and adds to the operator =9s comfort. This model takes less effort to control and has less =ibration compared to older tire models. Because the screening system is =ehind the drive tracks, no or very little tire tracks or compacted sand =s left after the cleaning process. Other walk-behind models on the =arket have problems with tire tracks and sand compaction after the =leaning process. Also, the screening process is easily seen from the =alking position, so you can accurately adjust the amount of material =ntering the system. The unit also has the ability to remove very small =each debris such as cigarette filters that large tractor pull-behind =iss. The only drawback of the sifting screens, as with all sifting =creen equipment, is the ability to screen out wet seaweed. Screens become clogged preventing sand =rom going through, dry seaweed

presents little problem. The model has =ad excellent results in all sand types and excellent reliability. It is =ot limited to beach areas; they work well in sand golf bunkers and =ndoors-outdoor sand horse arenas.

We reviewed the pictures and =e feel the Barracuda track drive beach cleaner would work well in the =onditions as seen except for the large amount of seaweed in one =icture. Again, all walk behind beach cleaners on the market use the =ifting screens and they will all have the same problem with wet =eaweed.

The price for the unit is \$14,300.00 US including 3 =creens. Shipping charges to your destination would be determined at =ime of sales and in addition to the price, unless =pecial offers are available, a 1year manufactures =arranty. Payment due in advance, delivery in USA: 10-15 =usiness days after payment confirmation/settles. (Barracuda – L175 x W100 = H100cm 350kg crated) We were running a spring special in April – =ay and can extend the offer to you if additional time in evaluating the =nit is needed. With the special offer we can ship the Barracuda to any =ontiguous US state. Therefore if you have a freight forwarder in =lorida we can ship it to their facility for the \$14,300.00 US.

If we can be of further assistance or answer any questions you =ay have on the equipment or beach accessories, please call or email us. =ank you.

Regards,

Herman A Lindau

Dear Mr. Kahn,

Thank you for your interest in CleanSands, Inc. and our innovative beach cleaning equipment, the Barracuda and accessories.

If you could give us more information on your location, type of debris looking to remove, we will be able to determine the best pricing and give you our recommendations for your sand area. Thank you.

Regards,

Herman A Lindau
