Subject: Pool Plan Studies G-7
Attachments: G-7 Pool Plan A 1-28-11.PDF; G-7 Pool Plan B 1-28-11.PDF

Jeffrey,

Here are two options for the pool based on our conversation yesterday when I called you in Paris.

G-7A:

The mezzanine has been taken out.

Two sets of doors symmetrically placed on the north wall=

Entry into the pool room will be through these doors.

Stair option going from +57' above all the way=down to +38' below.

Shower room is now at the southeast corner with a possib=e view out.

(We need to verify this with the existing topogr=phy)

The Pool equipment room is now at the southwest corner.<=:p>

(Fresh sir intake for HVAC and access could be a=problem here)

G-7B:

Same exact pool plan with the mezzanine taken out.<=o:p>

Another stair option going down to the +38' le=el at the northwest corner.

Introduction of a "Patio" at the entrances t= the pool with the vehicle drop-off between the doors.</=>

This is a much better transition from the pool to the ex=terior and gives us a buffer to the road.

Additional mechanical/pool equipment space to the south =f the shower.

(we need to verify topography here)<=p>

Please review and get back to us with your comments.

Again, if you would like to bring back the cascading sta=rs off of the screening room patio,

We will more than happy to redesign them back in..just let us know.

Thanks and have a nice weekend.

Tom
