Will do. Liston and I is here now mounting =he radios and align them. Once aligned Broadband will start tuning both =adios. We dealing with the different issues as we find them. E.g. =ealigning the dragon wave that suppose to point to stt. Removing viya =amage 5.8 radio. And the switch in the tower box decided to =ie.

Regards  
Jruan

Ps  
Stc is running at 15mb

please let me know when LSJ is fully functional with Broadband internet  
also what is STC speed?  
please advise  
thanks

Good night Rich

Broadband VI speed will be about 40mb (right now they are broadcasting about 15 to 20 MB for residences) but spoke to Mike one of the broadband supervisors and the boss will be getting business grade radios.

Once they improve on their infrastructure they can scale to 100mb without changing the radio if we wish.

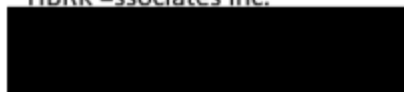

Regards  
Juan

Good =vening boss

Broadband is 100% complete =nd tomorrow LSJ will get the new radio for internet installed. It would =ave been today, but the generator at the tower died and Liston and =roadband scrambled to find a backup generator for the site. =ortunately, they found one ( it is not as big as the original but it =ould hold the load).
