Subject:	Wolfram Summer Programs registration open

Apply now to the Wolfram Summer Programs for Science, Technology & Innovation!

New this year is a special track for educators who want to develop materials and technologies using the Wolfram Language.
The focus of the Educational Innovation track will be changing the way people learn and teach--for example, creating tools for students to use, writing material for programming education, or improving management platforms for teachers.

Participants at the Wolfram Summer School come from many diverse backgrounds but share a common passion to discover and explore cutting-edge ideas. Over the past 10 years, they have included graduate students, undergraduates, professors, industry professionals, artists, and even a few exceptional high-school students.

College and graduate students should consider applying to the Wolfram Science track to do a research project at the frontiers of science.

Students who want to create the next big tech innovation should consider applying to the Technology & Innovation track.

This program will be held from June 19 to July 8 at Bentley University near Boston, Massachusetts. For more information and to apply, please visit:
http://education.wolfram.com/summer/school

The Wolfram High School Summer Camp is a project-oriented camp for high-school students, introducing them to cutting-edge programming, computational thinking, and innovative technology.

STEM-minded students with an interest in using Mathematica are encouraged to apply to the Mathematica track.

Entrepreneurial students who want to create an innovative technology project should consider the Tech Innovation track.

This program will be held from June 26 to July 8, also at Bentley University. Students must be age 17 or younger on July 8, 2016, to be eligible. For more information and to apply, please visit:
http://education.wolfram.com/summer/camp

For details, please visit the FAQ pages or contact us at summer@wolfram.com.
