Subject: Unit of Accounts

I've been looking into Unit of Accounts - https://en.wikipedia.org/wiki/Unit_of_account

Is the question whether =e can figure out a better way to understand "value" in =he context of the unit of account?

I think I'm starting to see =our point about "value" finally.

I think I'll write a whole =ther deeper and maybe more academic thing about "value" =nd accounts. Can you help me?
(Although you already sort of have...=in strange Yoda sort of way... but still.)
