Good morning Richard,

Friday's visit went well. We were able to document all needed plant data and its current overall condition. Michael will include the condition of the SW intake piping and SW intake pump system as well as the RO plant for review.

We are completing a new installation this week on St. Thomas, so Michael will not be able to work on his report until after this job is completed. He committed to having the completed engineering report to you the first week of December.

Regards,

Patrick Adams
