**Subject:** St Barts Heli flight

Jeffery, here is the satilight photo

Weather for tomorrow's heli flight to St Bart will be similar to today= weather, low visibility due to low pressure North of St Thomas, If the Lo= pressure continues to move North weather should improve,. Note the satigh= image below, there is a line of weather between St Thomas and Puerto Rico= which builds up in the afternoon, since its pushing down from the North d=e to the spiral movement of Low pressure.
