I noticed Friday the A/C in your bedroom wasn't getting cold so I called Ree=co again. It was back up Friday but it went back down on Saturday so I had t=em come out this morning. It's back up again but Rafael said the breaker is=tripping because the salt air has rusted out the right side of the condensi=g unit. He said he repaired it but he's suggesting that we change the unit a=ap.
