Advice on what type of tv to buy for m= bedroom (in DC)? I don't know the difference between led, 4D, blah b=ah. Per below from my contractor, it is supposed to be thin. Al= o prefer one that comes without the CIA/NSA option....

Hi Kathy,

I can work around that for a couple of days. I realize the choic= of available tv options is off the charts. Building a niche for a tv, auto=atically restricts you to future size upgrades. However, one dimension that=(in your exhaustive search) should be dialed in ,is the thickness. Currentl=, readily available televisions are available in a LED,LCD,and Plasma forma=. I'm no techie, I.e. I deal with the application of math, chemistry, physi=s, history, and reading comprehension, on a daily basis. Semi-conductors ar= outside of my knowledge base. Once all those little bytes have been neatly=packaged, game on.

See if you can narrow your search to pre=ent me with the overall thickness of the television. Gabby has specified th=t the existing wall will be padded approximately 2", and many LED type tele=isions fall within that dimension. If, however, you opt to go with a thicke= tv, we may need to forego the articulating arm, and simply bolt the thing t= the wall (So that it doesn't project beyond wall plane)

So=ry for the long-winded explanation, but I thought it wise to give you some p=rameters.

Thanks,  
<=r>Jim

Hi Jim,

I am not going to use the same tv (too small),=but am not quite sure what size the new one will be. Do you need to know by Tuesday?

Kathy

Hi Kathy,

Thanks for the follow up on the ceiling. I pushed the framing crew back one day (They will start on Tuesday)

In preparation for the framing, I noticed that there will be a niche for the television. Ideally, the tv would be mounted to an articulating arm, so it can be set flush with the wall surface, when not in use. The dimensions of the niche, would be determined by the tv. Were you planning on using the tv that you already have? If so, where is it currently located? If not, did you have a particular model in mind?

Thanks again,

Jim
