Jeffrey

We are completing below floor under rear Lav,. Since its easy inspection,. =The pressurization silencer is located under trim tab control cables,. I'll n=ed 3 to 4 days to change this item, since cable rigging is involved,. I'll request price for exchange outflow valve as well,,

- I'm also changing nose wheel tires today,. Not sure if you noticed the vib=ation after nose wheels departs runway surface,. Usually it's a balance or o=t-of-round condition.,

All will be finished tonight.,

Thx  
Larry
