**Subject:** GIV update

Jeffrey.,

give me 20 more minuetes, Joel at interior shop is calling me back sho=tly with his numbers.,they are still working on it..

,, The headliner in Sellers GIV is factory installed PSU down was= and upwash lights, the seller has upgraded to LED lights but failed to ch=nge the style of PSU panel display. Our GII has a more modern PSU light pa=el which was installed in 1994. I spoke to Gulfstream interior shop in Lon=Beach, A complete interior wood, side panels, new galley design, wide=body headliner with current PSU slim design, entertainment, every thi=k aft of cockpit could cost, \$2M-\$3.5M according to Mike Sullivan at =terior shop, he is not a qualified person to estimate, but has knowledge =f Gulstream pricing. Eric Roth indicated \$1M - \$1.7M could easily be spent= There is no real price, since customization is endless.

The GIV "SP" I was told by GulfstreamI has a different headliner =esign attachment point which gives 1" extra headroom clearance, however, I=located a 1994 GIV SP with same headliner as in sellers GIV,.. so that does='t make sense to me., on controller, several1994 GIVSP with 6000 hours \$10M,,,the 2000 era G=VSP \$11.5M - \$15M with 4000 hours+
