**Subject:** Runco Projectors

Hello Mr Epstein,

I looked into the Runco Projectors for you and here is what I found.

The LED unit is model # Q-750 very nice projector but not enough light output for any of your theaters. LSJ and Zorro have very large screens and NY is a bright room this projector is not the correct option

We would need to go with the 3 chip DLP 1080p model # VX-22i which will have enough light output and great picture goes for \$34,000.00

If we wanted the optimum option we could go with the VX-33i which is even more powerful light output for \$ 49,500.00

I will not be able to get one of these for demo but will Have the Digital Projection projector Model # Highlite with me for the Zorro demo I think you will be very Impressed with it.

Let me know if you would like any other information on projectors.

Look forward to the Demo on Tuesday

Nick.
