**Subject:** Re: 6th floor projector

Nick said he thought the ceiling would handle the 130", he didn't remember it being a problem, just dry wall work to accommodate the larger opening,  
-as far as HDMI, nick said we are going to go direct from blue ray and cable box to projector with HDMI, the jBL synthesis is not HDMI, we would use only for audio only, and not video switching,  
Thx  
Larry

Jeffrey,  
See attachment for projector Nick is recommending for the 6th floor on 71st, this is dual lamp projector, Nick indicates it has good light projection if the room is not completely dark,. Price \$29,500.00  
He is also recommending a SI 130" diagonal screen \$4,200.00 Nick thinks the screen size currently installed is 90 or 100 inches on the 6th floor.

if you are satisfied with the speakers at this time, we could:  
-install a Blue Ray DVD,  
-remove the Direct TV box,  
-Keep Cable box for local and High def,  
-include an Ipod dock for music listening or hook up the computer for slacker music listening,.

your thoughts?

Thank you,  
Larry
