Warwick

The kitchen North wall outside dim. is 20'9" close to the existing centerline dim. of the livingroom arches

alternatives 1. should be a double window matching the existing living room arches ,look at 18" off the floor and 30+-up

2.large 8'+- picture window with elliptical arch 18" oo 30" off floor, maby divided

3.other solutions you reccomend to complement the architecture.

Will do. Has the window been designed yet? If not, any direction? Size? Type?

Thanks,

Warwick Wicksman

Jeffrey is concerned about the elevation fo the kitchen. when you show the window give him a couple of alternatives that reflect the architecture of the main house,one should incorporate a arch,maby divided glass. call me to discuss.Lets try to show the window on the next generation due out Tue.or Wed.
