Story  
Jeffrey requested the following info

attached photo's of the fountain, I added water to the basin to give a true picture.

if the center column was removed the distance from waterline to the top of bowl would be  
31 inches

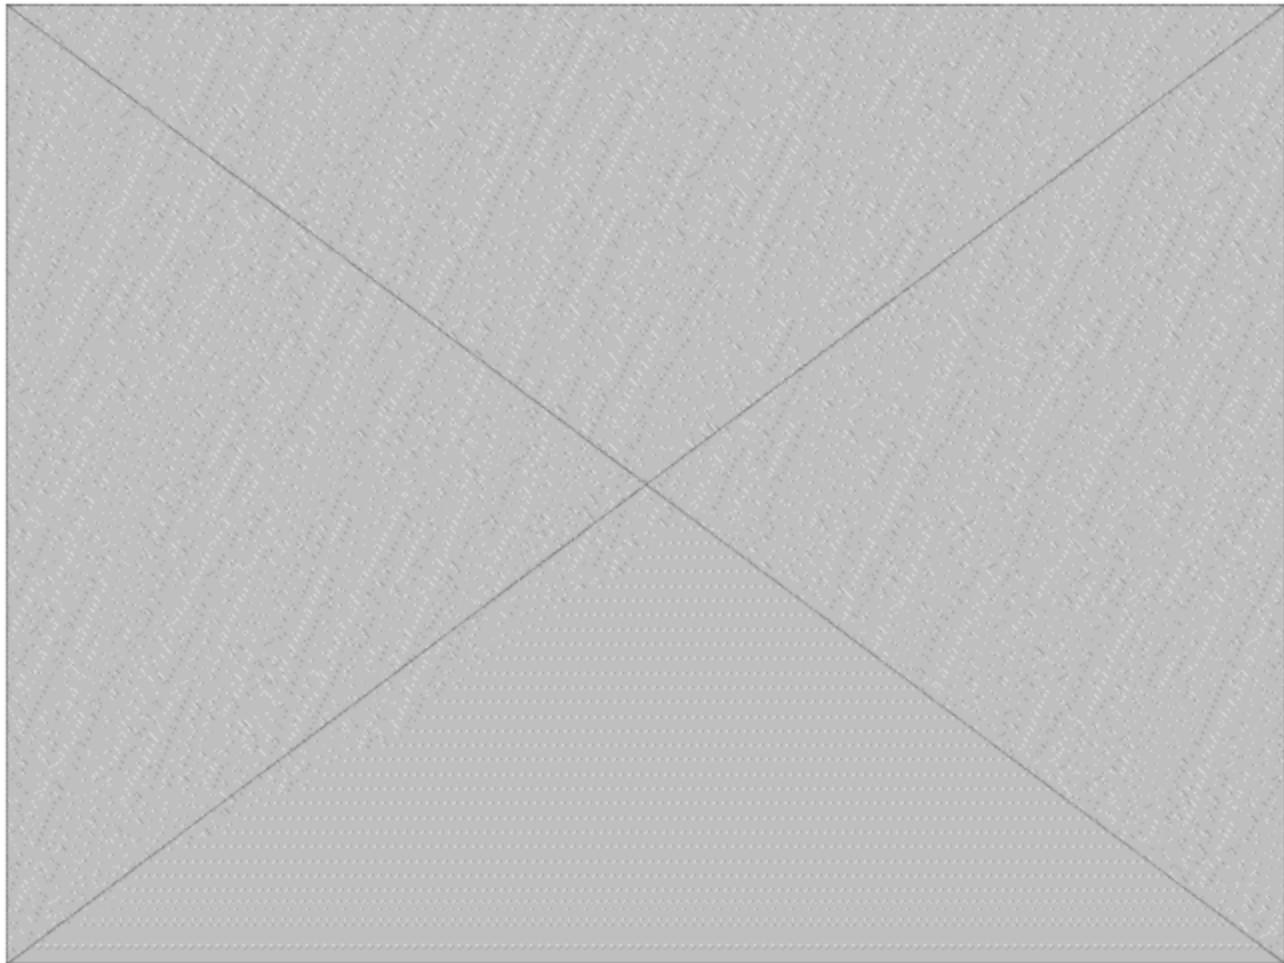

if the center column and a 7"lower portion of the bowl was removed, the distance from  
waterline to top of bowl would be 24 inches

I have concerns if center column and a portion of the bowl was removed that the bowl  
would be to close to the edge of the lower basin, water may hit the edge of the  
basin, instead of directly going into the basin.

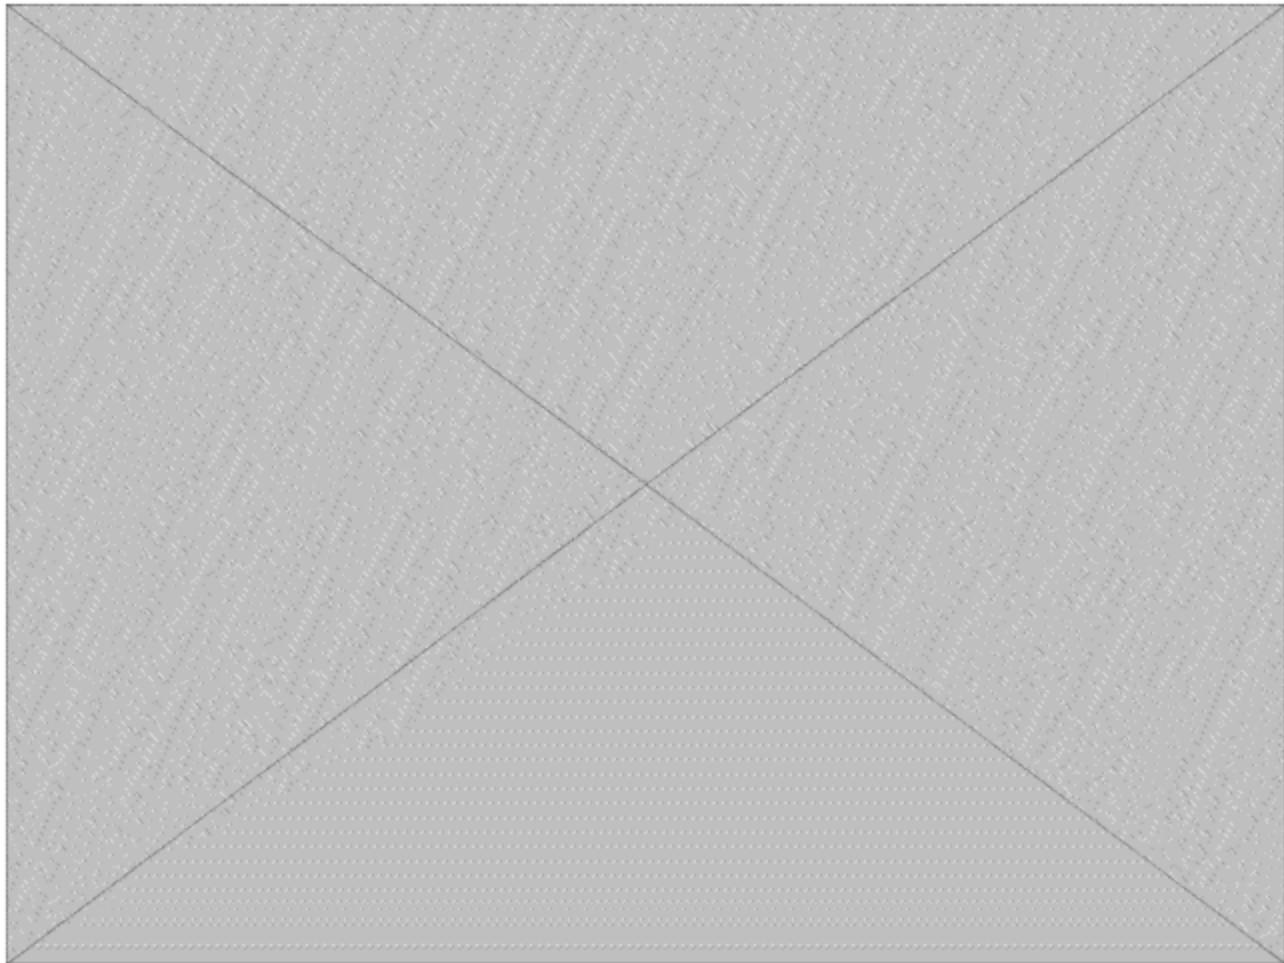

It would take JJ 3 - 4 days to complete work

how do you wish to proceed.

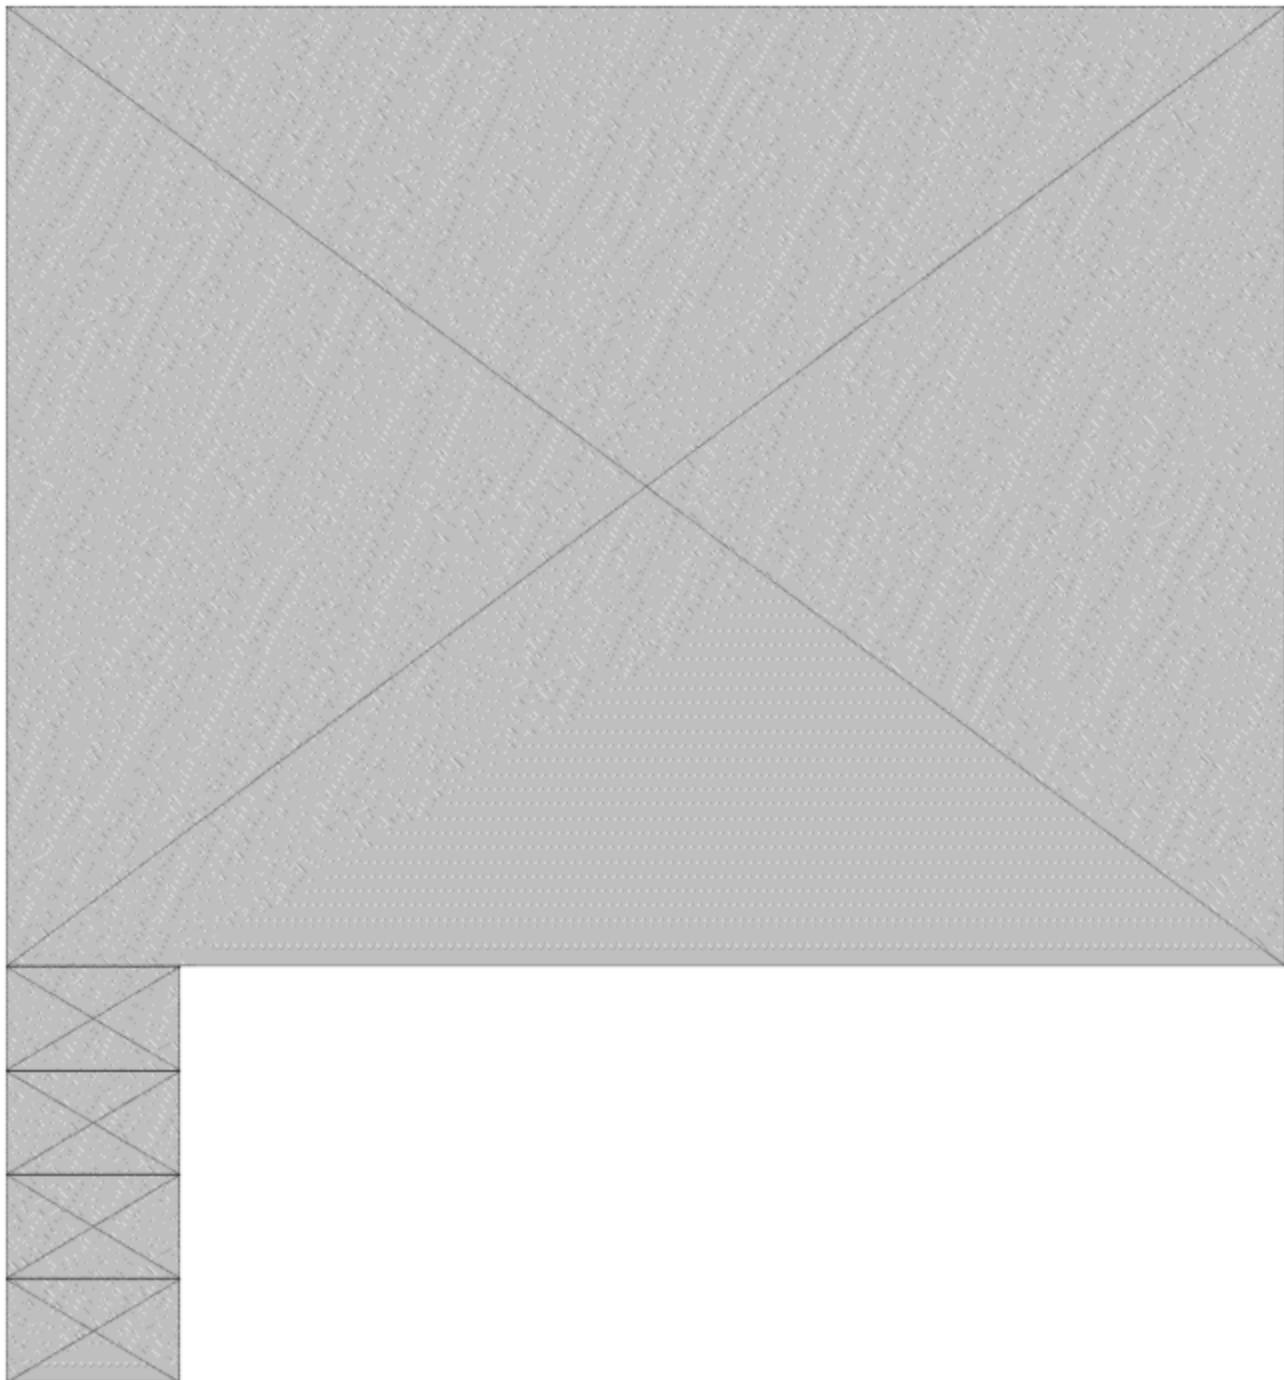

Brice
