Hi Jeffrey (and Lesley),
Hope all's well and you're enjoying the summer..

Working on a few things these days:

- 1) Research aimed at predicting trajectories of viral evolution
- 2) Research aimed at developing a female viagra
- 3) Research aimed at developing a probiotic to increase gut metabolic rates (weight loss)
- 4) Large scale data aggregation and mining to predict pandemics

Let's hang out sometime.

Nathan

The following is from Jeffrey Epstein:

What are your summer plans? Can you bring me up to speed on what you are working on?
