**Subject:** carribean install

We cannot provide the installation of plant material in the Caribbean. John Wyzykowski, our Nursery Manager, has worked successfully with Groundworks in the past. They have extensive experience in non-US projects. They can provide the trees we have identified, arrange the shipping and do the install. I can appreciate why you would want all the work to be done by one vendor. I don't believe there are any reputable installers who guaranty their install in the weather-threatened Caribbean. Please call Melissa, the owner of Groundworks, at 800-753-5127 or on her cell at 561-436-3132. Thanks for giving us the opportunity to become involved in your island beautification project.  
Don Carter
