Subject: RE: Jeffrey Epstein

Hi Jeffrey -

Just finished my inaugural semester teaching my "Music and The Brain" course at the Herb Alpert School of Music...

this summer am finally getting the Grammy project on the critically-ill infants off the ground at UCLA...

I've been spending too much time doing medicine to feed the cow, not enough neuroscience, not enough time working on my Oxford book, Cognitive Neuroscience of Music - I signed the contract this spring....

stealing time here and there to read Nietzsche's "Birth of Tragedy" - a must-read, Jeffrey...he later wrote in his "Maxims and Arrows", "Without music, life would be a mistake"...

I was nominated for the Board of Governors at the National Academy of Recording Arts & Sciences and have grown close to Head of Creative at Universal Music, Tom Sturges - he joined our Institute's Board last month,...unusually authentic guy for an A&R type - teaches inner city 5th graders creativity/music from 730-830A in the morning!...his ex is Miley's songwriter...

give a call, JE - too long since last kibbutz...worried about you and the craziesxxx
