Good Morning,

As Requested, I have compiled a list of suggestions to increase the visual "Color" of the island.

I have taken photos of certain areas suggested by Brice to focus on, and I have attached photos of plants I think would do well there.

I have also included a few photos of native Mahogany and Turpentine trees that I think would do well along the south coast.

To be perfectly clear-

I recommend the following:

Because of their hearty attributes, heat and drought resistance, and proven acclimation **to this region.**

Flowers:

- Oleander
- Frangipani
- Bouganvilla
- Desert Rose
- Ginger Thomas

Trees:

- Flamboyant
- Mahogany
- Terpentine

***I have also attached an excel spreadsheet with some price considerations.

An interesting website illustrating and describing the native, and most prolific local plants/flowers.
