Subject: boxee alpha is here! download it to your Linux, Mac and AppleTV today.

we are excited to welcome you to take part in alpha testing of boxee.
follow this link to validate your email and enable boxee :)
http://app.boxee.tv/validate/veiwqedn

for a quick overview of a few of the features check out this video
http://vimeo.com/2010794 boxee for Linux is supported on Ubuntu 8.04 (Hardy
Heron) or 8.10 (Intrepid Ibex) x86 (not x86_64) operating systems.
boxee for Mac (Intel based) works on OS X 10.4 (Tiger), 10.5 (Leopard), and
AppleTV.
to install boxee on AppleTV, please see
http://howto.wired.com/wiki/Hack_Your_Apple_TV_With_Boxee

to report bugs, submit feature requests or if you have any questions, you can
head to our community forum at http://forum.boxee.tv,
http://getsatisfaction.com/boxee or send an email to support@boxee.tv
