JE- I am calling you now.

It was a sensational evening. Drew Barrymore and Jessica Lang are off the charts great...I will send you a dvd...it airs on HBO April 18th...getting rave reviews...Jackie-O's lunatic aunt and cousin break your heart and also horrify you at the depth of their mental illness...but to watch this soap opera and then actually go to the very house...with doopy Sally Quinn and Ben Bradlee at the door was too much.

People ran upstairs to their bedroom and jumped on their beds!!!

Not kidding...Christie Brinkley, Steve Kroft, Lorraine Brocco, Bob Balaban.....Martha Stewart came over in the afternoon to help me arrange flowers!!! Then can to the film and cried when she saw the mess/cat shit in the house...really- no kidding she was moved about the lunatic mentally sick mother/daughter relationship...xoxo Peg
