I am interested in your thoughts on Wolfe's new book. (saw review on HuffPost this am) It is supposedly an insider's look at the Obama White House & is said to paint Larry in a very negative light. Given how well you know Larry, is this worth the read? Or is it the Obama Admin. trying to create scapegoats to blame during the next 2 years, create a way to pivot from his policies without seeming to, etc.? I am sure the NOW crowd at Harvard will be happy with it.
